

Editor: Fakhreddin Jamali

In This Issue:

A new topological descriptors model for predicting intestinal epithelial transport of drugs in caco-2 cell culture.

Simultaneous determination of vitamins C, E and b-carotene in human plasma by high-performance liquid chromatography with photodiode-array detection.

***In vitro* characterization and delivery of chitosan-DNA microparticles into mammalian cells.**

How cheap are Canada's drugs really?

Cyclooxygenase-3: axiom, dogma, anomaly, enigma or splice error? - not as easy as 1, 2, 3.

Comparison of urinary excretion of phenolsulfonphthoein in an animal model for Wilson's disease (Long-Evans Cinnamon rat) with that in normal Wistar rates: involvement of primary active organic anion transporter.

Liposomal prilocaine: preparation, characterization, and *in vivo* evaluation.

Multicomposite ultrathin capsules for sustained ocular delivery of ciprofloxacin hydrochloride.

Tamoxifen in topical liposomes: development, characterization and *in vitro* evaluation.

Synthesis of 4-aryl substituted semicarbazones of some terpenes as novel anticonvulsants.

***In vitro* activity of commercial valerian root extracts against human cytochrome P450 3A4.**

Comparative effects of curcumin and an analog of curcumin on alcohol and PUFA induced oxidative stress.

Proceedings of the CSPS 7th Annual Symposium on Pharmaceutical Sciences.

Proceedings of the AFPC Annual Conference 2004.
