

Newborn Screening...Just because we can?

**Victoria Seavilleklein, PhD
Ethicist & Policy Director
Provincial Health Ethics Network**

**Friday, 26 February 2010
12:00 — 12:45 pm
Room 2-07 Heritage Medical Research Centre**

The advent of new technology has enabled the massive expansion of newborn screening programs in North America, designed to detect metabolic and other disorders in newborns. This presentation explores the ethics of newborn screening, including its benefits and challenges.

Available via Telehealth by contacting 780-492-6676 or dossetor.centre@ualberta.ca or your local provider at least 2 business days prior to the event.

For more information, please call 780-492-6676 or visit www.ualberta.ca/BIOETHICS/

EVERYONE WELCOME!
