Introduction

During the summer of 2007, the Provincial Institutes/Ordre and CICA conducted a comprehensive compensation survey of all CAs. The survey was conducted to develop a guide to aid members and those who hire members during salary negotiations. In addition, the results will be used to promote the profession to the best and brightest students across Canada.

The results of this survey are included in nine reports, a summary report covering all findings and eight regional reports. The summary report and the other seven regional reports are available on the CA Source website (www.casource.com) and on most Provincial Institute/Ordre websites. The reports are as follows:

- CA Compensation Survey October 2007 – Summary Report
- CA Compensation Survey October 2007 – BC and Territories
- CA Compensation Survey October 2007 – Alberta
- CA Compensation Survey October 2007 – Saskatchewan
- CA Compensation Survey October 2007 – Manitoba
- CA Compensation Survey October 2007 – Ontario
- CA Compensation Survey October 2007 – Quebec
- CA Compensation Survey October 2007 – Atlantic Canada
- CA Compensation Survey October 2007 – Bermuda, US and International

Methodology

For details on methodology please refer to the Summary Report

Note on Reporting of Results

To protect the privacy of respondents and to avoid misleading results, the mean and median for compensation data was only presented when there were at least 5 respondents in a subcategory and upper and lower quartile information was only shown when there were at least 20 respondents in a subcategory. Definitions of the four statistical measures used in this report are provided below for reference:

Mean: (also called average) is the sum of all cases divided by the total number of cases

Median: (or 50th percentile) is the value above and below which half the cases fall. If there is an even number of cases, then it is the average of the two middle cases. As compared to the mean, the median is not sensitive to outlying (a few very high or very low) values.

25th Percentile: is the value above which 75% of the cases fall

75th Percentile: is the value below which 75% of the cases fall

CMA (Census Metropolitan Authority) and CA (Census Agglomeration) are one more adjacent municipalities situated around a major urban core. To form a CMA the urban core must have a population of at least 100,000 and to form a CA the urban core must have a population of greater than 10,000 but less than 100,000.

Note that findings in this report are representative of those sampled and may not precisely represent membership as a whole. One noted difference that is likely to understate the compensation numbers presented in this report is that younger respondents are over represented in the sample.

Note that some results do not add to 100 due to rounding.

Section 2: Compensation

Overall Compensation

The table below shows the mean (average), median and top and bottom quartiles for member compensation from either employment or business. Figures below include members who worked at least one full month in 2006. Compensation of those who worked less than full-time for 12 months was annualized based on a 35 hour work week.

	2007	% Change	2005
N	1,990		1,824
Mean	\$212,314	27.6%	\$166,373
