

**Disclosure statement: Timothy Caulfield,  
Health law Institute, University of Alberta (2021)**

My research is funded by provincial and federal entities, including Alberta Innovates, the Canadian Blood Services, the CIHR, Health Canada, Genome Canada (and the associated provincial organizations), the Public Health Agency of Canada, the Office of the Privacy Commissioner of Canada, the World Health Organization, and several Networks of Centres of Excellence (e.g., the Stem Cell Network and AllerGen). I do not receive any industry funding for my research or for the support of my students or research team. I do not serve on any industry boards and I do no paid consulting for industry or other entities. I do not have a financial interest in any companies that require disclosure. I work with a speakers' bureau (Speakers' Spotlight), several commercial publishers (e.g., Penguin Random House Canada), and a TV production company (Peacock Alley Entertainment). I also receive modest compensation for some of my other media work, including the publishing of articles in the popular press and hosting radio shows.

I sit on several policy, research and ethics committees (see my CV for a full list), but do not receive compensation for my participation (when required, travel expenses are paid). One of my committees, the WADA Ethics Committee, pays a modest honorarium for face-to-face meetings. Below is a list of presentations from June 2018 – March 2021. See my CV for a full list of my presentations. For some I was compensated (negotiated through Speakers' Spotlight) and for most my travel expenses were covered either by the organizer or a research grant. In 2018, The Garfield Weston Foundation contributed \$5000 to the HLI for administrative support in return for a talk I provided to their board.

“Relax, Dammit! Dealing with Misinformation in the Age of Anxiety,” Institute of Musculoskeletal Health and Arthritis, Webinar Series, March 16, 2021.
