

Psychiatry 602: Advanced Topic in Psychiatry

3 (fi 6) (either term, 3-0-0). A discussion of selected topic of current interest in psychiatry including microbiological and psychosocial aspects of the etiology and treatment of mental disorders. Prerequisite: consent of Department.

Course Detail

- The student must review the possible grouping of seminars he/she wishes to take with his/her supervisor and the course coordinator prior to the commencement of the seminars.
- The students should have the topic for their term paper approved by the course coordinator in the first half of the course, and the paper must be handed in by the end of the last seminar in that student's course.
- The final written examination will normally be held within 2-3 weeks of the completion of the student's last seminar.
- The distribution of marks is currently as follows:
 - Final written examination: 65%
 - Term paper: 35%
- The term paper will be marked by the course coordinator and one other academic staff member who is not the student's supervisor or co-supervisor.
- The course coordinator will collate the results from the written examination and the term paper and determine the final grade
