

UNIVERSITY OF ALBERTA

A CELEBRATION OF
RESEARCH & INNOVATION

100! 1908-2008
YEARS

MARCH 19, 2009

Message from
Dr Lorne A Babiuk,
Vice-President (Research)
University of Alberta

The University of Alberta is committed to building on our existing strengths in research, scholarship and the creative arts by partnering in innovative ways with government, industry and others to develop a knowledge-based economy and strengthen interdisciplinary links with our community and beyond.

Our goal is to support the talented people at the University of Alberta—faculty, support staff and students—with resources and services to build one of the world’s great universities for the public good.

This event celebrates the breadth of research at our University and the scope of our contributions to Albertan and Canadian society.

Critical to the success of the University of Alberta’s research is the important and valued funding from federal and provincial agencies, foundations and private sponsors. We gratefully acknowledge these organizations’ continued support of the creative life of the University.

The University of Alberta would also like to thank the following sponsor of this event:

NSERC—Prairies Regional Opportunities Fund

“The people demand
that knowledge shall
not alone be the
concern of scholars.
The uplifting of the
whole people shall be
its final goal.”

Henry Marshall Tory
First President
University of Alberta, 1908–1928

Award Presentations

2008 Rhodes Scholarship

The Rhodes Scholarships, the oldest international fellowships, bring outstanding students from around the world to the University of Oxford.

Recipient:

PETER GILL,
Medicine and Dentistry

VIDEO PORTRAIT: RHODES SCHOLAR & GENTLEMAN

This year's Rhodes Scholar winner, Peter Gill (an undergraduate in the Faculty of Medicine and Dentistry), is an outstanding student with an amazing variety of volunteer and other interests, ranging from working on a political campaign to organizing a fundraiser for Kids with Cancer to spending the summer volunteering in a rural hospital in Uganda.

Peter appreciates the opportunities that opened up for him at the University of Alberta, which has an outstanding medical school with world-class teachers and a strong research program:

"The Faculty is known for its strong mentorship of students and has a reputation for producing top graduates. The U of A is an institution of excellence and my undergraduate experience was so positive, I wanted to continue that in medical school. Furthermore, I wanted to complete my medical program in Alberta, as I plan on practising here when I finish residency."

Julie Payette—NSERC Research Scholarship

These research scholarships are the most prestigious NSERC scholarships offered at the Master's level and are awarded to the 24 top-ranked Master's scholarship competition candidates across Canada.

Recipient:

SHANNON LEBLANC,
Biological Sciences

FOCUS ON SHANNON LEBLANC

Shannon Leblanc researches bacterial pathways and how they respond to cues in the environment. Her research contributes to our knowledge about how bacterial systems work—crucially important in an era of bacterial “superbugs.”

In 2008, she received a Julie Payette—NSERC Research Scholarship. Winners of this scholarship, named for Canadian astronaut and NSERC Council member Julie Payette, are chosen for their outstanding academic excellence, research ability and potential, and leadership and communication skills.

Two previous NSERC Undergraduate Student Research Awards allowed Shannon to spend two summers in a lab—work that she found she loved and which led her into graduate studies. After her graduate work, Shannon would like to explore teaching—ideally, combining teaching with further research.

Alberta Ingenuity
Postdoctoral Prize/NSERC
Postdoctoral Fellowship

The Alberta Ingenuity Postdoctoral Prize is awarded to Canadians who take up an NSERC Postdoctoral Fellowship in Alberta.

The NSERC Postdoctoral Fellowships support outstanding researchers at a key time in their careers. The fellowships also encourage highly qualified Canadians with leading-edge scientific and research skills to enter Canadian industry, government and universities.

Recipient:

GREGORY THIEMANN,
Biological Sciences

**VIDEO PORTRAIT:
POSTDOCTORAL FELLOWS—
THE “ENGINES” OF
UNIVERSITY RESEARCH**

During his time as a postdoctoral fellow at the U of A, Dr Gregory Thiemann, a postdoctoral fellow in Biological Sciences, has won three prestigious research awards. In 2008, he received an Alberta Ingenuity Postdoctoral Prize, and in 2007, an NSERC Postdoctoral Fellowship and an Honorary Izaak Walton Killam Memorial Postdoctoral Fellowship.

One of a small number of Canadian researchers studying the effects of climate change on polar bears, Greg believes that working as a postdoctoral fellow at the U of A has given him an opportunity to train in a highly productive and scientifically rigorous research department:

“The chance to work with my supervisor Andrew Derocher was the primary reason I came to U of A, but I have benefited from my interactions with all other faculty, staff and students...I hope that my research will provide new insights into how Arctic ecosystems operate, provide baseline data for measuring future ecological and environmental change and establish a more biologically sound framework for the conservation and management of Arctic wildlife.”

Killam Annual Professorships

The Killam Annual Professorships are awarded to academics at the University of Alberta in recognition of their outstanding research, teaching and community service.

Recipients:

- > **EHUD BEN ZVI**, History and Classics
- > **DAVID BUNDLE**, Chemistry
- > **DAVID COOPER**, Accounting and Management Information Systems
- > **TRACEY DERWING**, Educational Psychology
- > **GREG GOSS**, Biological Sciences
- > **FAYE HICKS**, Civil and Environmental Engineering
- > **MARTY LUCKERT**, Rural Economy
- > **LINDA MCCARGAR**, Agricultural, Food and Nutritional Science

Alberta Order of Excellence

The Alberta Order of Excellence is the highest honour the Province of Alberta can bestow on a citizen. Members have made an outstanding provincial, national or international impact.

Recipient:

DAVID SCHINDLER, Biological Sciences

FOCUS ON DAVID SCHINDLER

Dr David Schindler is an internationally celebrated scientist who has led efforts to protect fresh water resources in Canada and around the world.

Dr Schindler studies fresh water shortages and the effects of climate change on Canada's alpine and northern boreal ecosystems.

As well as conducting field and lab work, Dr Schindler mentors graduate students and offers courses with a strong interdisciplinary approach to environmental science. He encourages his students to consider the economic, philosophical, social and political aspects of environmental studies.

His groundbreaking research has alerted authorities and the public to the effects of pollutants and climate change on the environment.

Over the years, Dr Schindler's work has been widely used in formulating ecological management policy in Canada, the United States and Europe.

NSERC EWR Steacie Memorial Fellowship

The EWR Steacie Memorial Fellowships are awarded to enhance the career development of outstanding university faculty who are earning a strong international reputation for original research. This award is one of Canada's premier science and engineering research awards, and up to six are presented annually.

Recipient:

DENNIS HALL, Chemistry

FOCUS ON DENNIS HALL

Dennis Hall works on a group of compounds called boronic acids and esters. The applications for his research range from medicine to industrial uses.

Dr Hall recently discovered that certain boronic acids are very good catalysts for making amides (which are used in more than a quarter of all pharmaceutical drugs).

Traditional methods for making amides are complicated and produce a lot of waste, some of it toxic. Dr Hall uses a new method that can be carried out easily at room temperature and leaves only water as a byproduct—a way to make this chemical process both much more efficient and environmentally friendly.

In 2008, Dr Hall also received the prestigious National Research Council of Canada Steacie Prize and Merck Frosst Centre for Therapeutic Research Award, and he became a University Professor.

Performance: GeriActors and Friends

David Barnet from the Department of Drama is the Founding Director of GeriActors and Friends.

This community project spans the generations with a collaboration between University students and the GeriActors, a local theatre company of seniors that writes and performs its own material. The actors, aged late sixties to early nineties, use their life experiences as the basis for dramatic scenes and storytelling.

David Barnet recently received a prestigious 3M National Teaching Fellowship, in part for his work with this community group.

Fellows of the Royal Society of Canada

The Academies of the Arts, Humanities and Sciences of Canada are the senior national body of distinguished Canadian scholars. Fellows are selected by their peers for outstanding contributions to the natural and social sciences and the humanities.

Recipients:

- > **PETER BASKERVILLE**,
History and Classics/Humanities
Computing
- > **MIKE BELOSEVIC**,
Biological Sciences/Public Health
Sciences (in 2008, Dr Belosevic also
received the American Society of
Parasitologists' Clark P Read Mentor
Award and was named a University
Professor)
- > **ROBERT CREASER**,
Earth and Atmospheric Sciences
- > **WAYNE GROVER**,
Electrical and Computer Engineering (in
2008, Dr Grover also received the Alberta
Ingenuity Fund Research Excellence
Award—APEGGA Summit Award
- > **WOLFGANG JÄGER**, Chemistry
- > **GARY LIBBEN**, Linguistics
- > **MARK NUTTALL**, Anthropology
- > **CLAUDINE POTVIN**,
Modern Languages and Cultural Studies
- > **MIRIAM STEWART**, Nursing
- > **MELVIN TYREE**,

- > **JEAN VANCE**, Medicine

VIDEO PORTRAIT: RESEARCH WITH INTERNATIONAL IMPACT

Terrie Lynn Thompson, a doctoral student in the Department of Educational Policy Studies, has won an Andrew Stewart Memorial Graduate Prize (University of Alberta) and a Joseph-Armand Bombardier Canada Graduate Scholarship, Doctoral (SSHRC)—awards that she says have allowed her to continue her graduate studies.

Co-supervised by Dr Janice Wallace and Dr Margaret Haughey, Terrie Lynn's research on how workers use online communities has led her to consulting work in China and further research in the UK.

Her research focuses on how self-employed workers experience informal work-learning in online communities. This work has implications for how organizations structure online courses and other learning opportunities, both for their own and contract employees:

"I've taken a critical look at how alliances between people and technologies emerge in these online cyberspaces and the impact of these 'networks' of people and objects on learning and work lives. My research raises questions about how well people—here in Canada and globally—are able to leverage the learning opportunities potentially available through the power of the Internet."

Canada-US Fulbright Program

The Canada-US Fulbright Program gives outstanding Canadian and American students and scholars the chance to lecture, do research and pursue graduate study in the United States and Canada. Award recipients include prominent and promising scholars, experienced and junior professionals as well as exceptional students.

Recipients:

- > **LAURA BEARD**, Texas Tech University, Native Studies, Fulbright Scholar at the University of Alberta Faculty of Native Studies
- > **JAMES GRIJALVA**, University of North Dakota, School of Law, Fulbright Scholar at the University of Alberta Faculty of Native Studies
- > **LOIS HARDER**, Political Science, Fulbright Visiting Scholar at the University of Hawaii—Manoa, Department of Political Science, Honolulu, Hawaii
- > **PAUL HJARTARSON**, English and Film Studies, Fulbright Visiting Research Chair at the Canada Institute, Woodrow Wilson International Center for Scholars, Washington, DC

J Gordin Kaplan Award for Excellence in Research

The J Gordin Kaplan Award for Excellence in Research is the most prestigious University of Alberta research award and is named for the University's first Vice-President (Research).

Recipients:

- > **RANDALL MORCK**,
Finance and Management Science
- > **DENNIS VANCE**, Biochemistry

FOCUS ON 2008 J GORDIN KAPLAN AWARD FOR EXCELLENCE IN RESEARCH RECIPIENTS

RANDALL MORCK

Kaplan Award recipient Dr Randall Morck comes from the field of international finance, focusing on information economics, corporate governance, international finance and corporate control.

Dr Morck has an exceptional ability to translate academic research into public policy (for example, he has advised congressional committees in the US and House of Commons committees in Canada). He has also served as an advisor to the International Monetary Fund, the World Bank, the Toronto Stock Exchange, and the Governments of Canada and South Korea on corporate governance issues.

Dr Morck has built up an enviable publication record, with a very high citation rate—according to the Social Sciences Citations Index his papers have been cited 2,236 times by other researchers.

DENNIS VANCE

Dr Dennis Vance's biochemical discoveries have provided unique insights into the causes of diseases such as fatty liver (a condition that can lead to cirrhosis), diabetes, atherosclerosis, obesity and muscular dystrophy.

The clinical applications of his findings have enormous implications for the study of Alzheimer's disease and Vascular Dementia, conditions in which cholesterol-lowering drugs are increasingly used to prevent the onset of dementia.

Dr Vance continues to teach introductory biochemistry courses as well as several graduate courses. In addition, he has developed a national course on lipids, obesity, lipoproteins and atherosclerosis for graduate students across the country. Dennis Vance became a University Professor in 2008.

VIDEO PORTRAIT: THE BIRTH OF A RESEARCHER

Receiving a Roger S Smith Undergraduate Student Research Award gave Shungu-Elaine Mushayandebvu—an undergraduate student from Augustana Faculty—the chance to work on a summer research project in Psychology with faculty member Dr Sean Moore.

Shungu explored the pros and cons of programs aimed at boosting self-esteem. The project included many tasks familiar to researchers, including doing a literature review and presenting a paper at a conference.

“The Augustana Summer Student Research Assistantships are a great program. As a research assistant, I got the chance to use what I learned in the classroom and apply it to a real world setting.

“Money was the main reason for all my previous summer jobs. I learned how to paint houses; I guess that might come in handy some time in the future. I learned how to make and serve food in a number of Calgary restaurants.

“Though there are valuable skills and lessons I learned from these jobs, I could not directly relate any of them to my desired professional goals and what I am being trained for. Only the summer research assistantship gave me what I view as a glimpse into my future—an opportunity to do the work while still under the guidance and tutoring of my supervisor.”

Martha Cook Piper Research Prize

The Martha Cook Piper Research Prize commemorates the significant contribution Dr Martha Cook Piper made to the research community while Vice-President (Research) and Vice-President (Research and External Affairs) at the University of Alberta.

This award recognizes two faculty members who are at the early stage of their careers, enjoy a reputation for original research and show outstanding promise as researchers.

Recipients:

- > **KEVIN HAGGERTY**,
Sociology (in 2008, Dr Haggerty also received the Faculty of Arts Research Excellence Award)
- > **FINLAY MCALISTER**,
General Internal Medicine

FOCUS ON 2008 MARTHA COOK PIPER RESEARCH PRIZE RECIPIENTS

KEVIN HAGGERTY

Dr Haggerty is a leading international scholar in criminology, socio-legal studies and surveillance studies.

His research has been supported by SSHRC doctoral, postdoctoral, special project and multi-year grants.

Recently, he and six co-investigators received a seven-year \$2.5 million SSHRC Major Collaborative Research Initiative (MCRI) grant to study surveillance issues nationally and internationally.

His co-authored paper in the *British Journal of Sociology* set the course for a rapidly growing field of political and criminological research that emerged after the events of September 11, 2001.

Dr Haggerty also recently won a Faculty of Arts Research Excellence Award for his work on the nature and pervasiveness of surveillance in society.

FINLAY MCALISTER

Dr McAlister's work bridges the "treatment gap" – the gap between research findings and medical practice.

He is one of the main designers of the Canadian Hypertension Education Program, a campaign to educate health-care professionals and patients on the best ways to prevent heart disease.

Dr McAlister identifies a gap in treatment and then uses data sources to find out how patients are being treated and what their outcomes are. He then works to make sure patients get the same benefits as those studied in trials.

Going beyond simply publishing his results, he also publishes physician and patient surveys to find reasons for the gaps between the research evidence and real-world practice.

**VIDEO PORTRAIT:
FROM RESEARCH TO
COMMERCIALIZATION**

Tyler Wry's PhD program in Business focuses on the commercialization of nanotechnology. He has held a SSHRC Doctoral Fellowship (2006-2008) as well as receiving the Andrew Stewart Prize and Dissertation Fellowship.

Tyler has found that the University of Alberta's School of Business "has the best collection of institutional theorists in the world":

"I have amazing opportunities to work with giants in my field. My research has benefited immeasurably from common projects and casual coffees with people like Mike Lounsbury (my supervisor), Royston Greenwood, Dev Jennings, Roy Suddaby, and David Deephouse..."

"In areas like nanotechnology, which our governments (federal, provincial, local) have keyed in on as a crucible for economic competitiveness, it's important to try and understand how some research makes it from the lab to patents, why some of these patents become central points for development and how social structures shape these processes."

Professor Steven Kuznicki (NSERC Chair, Chemical and Materials Engineering) exemplifies some of Tyler's research about ways to successfully transfer university research into the business world.

With help from TEC Edmonton, a joint venture of the University of Alberta and the Edmonton Economic Development Corporation, Dr Kuznicki has set up a spin-off company, Alberta Nanometals, to commercialize his research in nanotechnology.

Canada's Top 40
Under 40

Canada's Top 40 Under 40 honours Canadians under the age of 40 who have reached a significant level of success. The program promotes mentorship and professional development by introducing these leaders to the business community and by promoting them as role models for young Canadians.

Recipients:

- > **JASON DYCK**, Pediatrics
- > **ATUL HUMAR**, Medicine

FOCUS ON CANADA'S TOP 40 UNDER 40

JASON DYCK

Dr Jason Dyck is the director of three heart research groups at the University of Alberta and vice-president of biotech company Metabolic Modulators Research Ltd. He also holds the Canada Research Chair in Molecular Biology of Heart Disease and Metabolism.

His research focuses on how hearts use different fuels (fats versus sugars) for energy. Most diseases of the cardiovascular system result in the heart preferring to use fat to continue beating.

Dr Dyck has found that regulating the heart's metabolism could promote sugar use instead—a discovery that helps patients' hearts function better.

The drugs his company has developed for heart disease also target the hypothalamus, the part of the brain that controls appetite. These drugs can now also be used in the treatment of obesity and diabetes.

ATUL HUMAR

Dr. Humar's research focuses on preventing, diagnosing and treating infectious diseases in transplant patients.

As most transplant recipients need to take immunosuppressive drugs, they risk developing unusual infections, including viruses such as cytomegalovirus. This virus (which is dormant in about 50 per cent of the population) can cause hepatitis and pneumonia in a transplant patient.

Dr Humar and his wife, Dr Deepali Kumar, also a transplant infectious disease physician, have started a new program in Alberta to prevent and treat transplant-related infections. Dr Humar and his team of transplant infectious diseases physicians, lab scientists, graduate students and postdoctoral fellows prepare patients for transplants and meet with them during and after the procedure for follow-ups.

Order of Canada

The Order of Canada is the centrepiece of Canada's honours system and recognizes a lifetime of outstanding achievement, dedication to the community and service to the nation. The Order recognizes people in all sectors of Canadian society.

Member of the Order of Canada

Members of the Order of Canada are recognized for a lifetime of distinguished service in or to a particular community, group or field of activity.

Recipient:

RAY RAJOTTE, Surgery

FOCUS ON RAY RAJOTTE

Dr Rajotte's current appointments at the University of Alberta include Director of the Surgical-Medical Research Institute, Director of the Islet Transplantation Group, Graduate Student Coordinator for the Department of Surgery, Professor of Surgery and Medicine and Adjunct Professor in the Department of Biomedical Engineering.

He founded the University's islet transplantation group, helping to design a treatment that could free diabetics from insulin injections.

Dr Rajotte was also involved in the development of the Alberta Diabetes Foundation and was the founding scientific director of the Alberta Diabetes Institute, a world-class research facility on our campus.

His leadership in the graduate program helped establish the school as one of the top graduate surgery programs in North America.

Officers of the Order of Canada

Officers of the Order of Canada are recognized for a lifetime of achievement and merit of a high degree, especially in service to Canada or to humanity at large.

FOCUS ON ARVIND KOSHAL

Dr Koshal is the Director of Cardiovascular Surgery in the Faculty of Medicine and Dentistry.

A highly skilled cardiac surgeon, he performed Canada's first implantation of the Thoratec left ventricular assist device—a small pump that improves blood flow in malfunctioning hearts. He was also a member of the team that performed the first total artificial heart implant in Canada.

In the ten years that Dr Koshal has served as chief of cardiovascular surgery, Alberta Health Services—Capital Region's heart transplant program has grown to be the largest in the country and now performs the most heart transplants in Canada.

During his time in Edmonton, the Cardiac Surgery Program at the University of Alberta Hospital has become one of the foremost in the country. The Program also has an outstanding Pediatric Cardiac Surgical Program and Resident Training Program for cardiac surgical trainees.

Dr Koshal received the Order of Canada for his contributions to cardiac surgery.

Recipients

- > **JACOB MASLIYAH**, Chemical and Materials Engineering

VIDEO PORTRAIT: SENIOR RESEARCHERS—FROM THE CLASSROOM TO THE WORLD OF WORK

Professor Emeritus Dr Jacob Masliyah received the Order of Canada and the ASTech Award for Outstanding Leadership in Alberta Technology for his work in improving processes in bitumen extraction, froth treatment and tailings.

As the NSERC Industrial Research Chair in Oil Sands Engineering, Dr Masliyah oversaw a highly successful collaboration between the University and industry. Industrial sponsors both applied Masliyah's research findings in their field operations and advised Dr Masliyah and his team about their issues in the field. This collaboration led to a mutually beneficial two-way information exchange between researchers and the oilsands industry.

Dr Masliyah also believes in the link between excellence in teaching and in research:

"Teaching is a sacred profession and we are duty bound to deliver the very best to our undergraduate and graduate students ... Students should have the best of the researcher-teacher in the classroom; otherwise we are robbing our students of the very best that the University can offer."
