

Vancouver Kimberlite Cluster

[2016 - 2017]

sponsored by

Dear Vancouver Kimberlite Cluster,

Please join us on Wednesday Apr 5th at 6:00 pm at UBC Robson Square where we will hear from Jim Greig, the CEO & President of Crystal Exploration Inc., on current exploration plans in the North Slave Craton area around Muskox and Jericho pipes. Please see attached abstract for details.

After the talk, we invite all guests to join us for a drink and discussion at 7:00 pm at the Lennox Pub on 800 Granville St.

Exploring Forgotten Diamond-bearing Ground in the North Slave Craton

Apr 5th @ 6:00 pm – UBC Robson Square Rm C400, 800 Robson Street

Jim Greig, MBA, CEO & President, Crystal Exploration Inc.

*Dean Besserer, P. Geo., Technical Advisor, Crystal Exploration Inc.**

*Kris Raffle, P. Geo., Consultant, APEX Geoscience Ltd.**

The talk will review near-term exploration plans for the North Slave Craton area around Muskox and Jericho pipes. The ground abandoned by Shear Diamonds has been taken by Crystal Exploration Inc., a Canadian public company traded on the TSX Venture Exchange. The advanced N Slave projects hold near \$100 million in past exploration expenditures that includes extensive geophysics, till sampling, kimberlite indicator minerals (KIMs), diamond indicator minerals (DIMs), bulk sampling and drilling. The Muskox Kimberlite Pipe is Crystal's most advanced asset with large tonnage (non NI43-101, >16mt) potential with grades near 0.50 cpt. Future exploration plans include drilling new high-priority discovery targets during the summer 2017. Crystal has identified 6 anomalous magnetic targets (high & low) that is supported by KIMs and pick results and additional 12 areas for spring ground geophysics that could provide more targets for drilling.

**possible participation – not confirmed*
