

Trailblazing Women
in Climate Science

Engineering

Miranda Wang

Miranda Wang, born in 1994, is the CEO and co-founder of NovoLoop, a company that transforms the most commonly used and unrecyclable plastics into new materials using pioneering chemical technology. The company's pilot program with San Jose's waste-management facility has already received recognition from groups like the U.N. Environment Programme, and now Wang is setting her sights on other cities all over the world. Miranda is a Forbes 30 Under 30, UN Young Champion of the Earth, and a Pritzker Environmental "Genius" Awardee.
