

Application Procedure for Care of the Elderly Program

Each applicant is asked to complete the application form and state in writing the reasons for requesting admission to the program. A curriculum vitae and three letters of reference are required. Undergraduate and postgraduate documentation may be required. Suitable candidates will be interviewed by the Program Director and members of the Residency Program Committee. Once accepted into the program, the applicant will meet with the Program Director to finalize individual goals and objectives for the program.

Contracts and funding are directed and supported by the Enhanced Skills Office of the Department of Family Medicine and Postgraduate Medical Education Office at the University of Alberta. There are currently four one year positions per year. These are funded at the level of a PGYIII resident.

Entry into the COE program is contingent on successful completion of the Certification in the College of Family Physicians (CCFP).
