MESSAGE FROM THE DEPARTMENT CHAIR

This year's annual report presents yet another productive year of research in our growing program. Grants, publications, presentations - impressive lists all. I want to highlight one particular list though that I find particularly heartening - the residents and students. Looking at that list, I see not just this year's report but the future of research in family medicine. Our researchers' contributions are many, but their mentorship of these residents and students may well be the most important of all.

*Dr. Lee Green, Professor and Chair
Department of Family Medicine
Faculty of Medicine & Dentistry*

MISSION:

To promote, support, create and disseminate research knowledge and scholarly activity in the discipline of family medicine, increase research capacity in the Department of Family Medicine, and enhance the research skills of faculty members, residents and students.

VALUES:

- Excellence and quality in research and scholarly activity;
 - Interdisciplinary collaboration on research projects;
 - Highest ethical standards in the conduct of research projects; and
- The diversity of generalist family practice and the research questions that arise.**

INTRODUCTION BY THE RESEARCH DIRECTOR

This comprehensive report provides details on the extensive research and scholarly activities that have taken place in our Department during the academic year 2017/2018. Two awards, deserve special mentions. In recognition of Dr. Lee Green's extensive research

career, a distinguished "Research Professorship" granted by the University of Michigan; and Dr. Scott Garrison received the "Researcher of the Year" award by the Edmonton Zone Medical Staff Association (EZMSA). To our knowledge, this is the first time a family physician received the EZMSA's research award.

The table of contents can guide you to the various sections in the report. If you are interested in our more recent research activity you may want to review the grants received. The ongoing projects and publications sections illustrate the eclectic nature of our research. There are also many unfunded projects and our Northern Alberta Academic Family Physicians (NAAFP) endowment fund has provided some support for projects that are not supported by other mechanisms. Our research includes a broad spectrum of topics and our researchers have skills in all types of inquiry and research methodologies.

Under other media you will find many useful resources such as asthma control tools, common medication costs, and a guide to mobility and independence. The podcasts and tools for practice contain knowledge synthesis activities including outputs from our evidence-based medicine (EBM) team of researchers. Our EBM team of researchers received national recognition on the cover and in an article of the Canadian Family Physician's September 2016 issue.

Finally, our residents are developing skills in practice audit and quality improvement. The titles of our second-year residents' practice quality improvement projects are published near the end of the report.

There is something here for everyone, Bon appétit!
