

LINDE CYLINDER RETURN FORM

Linde account holders are responsible for ensuring their cylinder balances are accurate and match the balances shown in Linde Express. If you have a discrepancy please contact Linde so that an on-site cylinder balance audit can be completed.

Cylinders are picked up from a secured area and must be accompanied by a completed return form prior to pick up by Distribution Services. Cylinders will be picked up at the department during order deliveries or upon request. The return form must list the number of each type of cylinder including a description of the contents, complete with UN number and quantity remaining. If the cylinder is empty, please indicate "empty" or "residue."

***All fields must be completed**
