Part 14 Notes - Admissions Statistics

Tables 14.1 - 14.4 provide data on the overall applications to programs at the University of Alberta by faculty, degree and year of program.

Because the University encourages applicants to indicate alternate program choices on their application, these tables report all applications, including first and alternate choices. Therefore, there are multiple counts for some students. For example, a student who applied to first choice Business (refused) and alternate choice Arts (admitted and registered) would be counted:

- under Arts - as an application
  - as admitted
  - as registered in this program

- under Business - as an application
  - as refused
  - as registered in another program

Users of this report should be aware of this multiple counting in the “Applications” column and “Registered in” columns.

A "transfer" student is based on the student's last school of attendance. This definition was effective with the 1992/93 Summary of Statistics. In previous years only students who received actual transfer credit were reported.

Effective with the 1992/93 Summary of Statistics out-of-province and out-of-country applications are reported in Table 14.4. Previously these were included in the Table 14.1.

Effective with the 1993/94 Summary of Statistics additional tables 14.5 through 14.8 were added to report on applicants. These tables reflect the status of an applicant’s first choice of program and count each student only once (i.e., multiple applications are not reported in these tables).
