

Internship Job Posting Form

Section A: Host Organization	
Host Organization Name	German Research Center for Artificial Intelligence (DFKI GmbH)
City	Berlin
Country	Germany
Primary Contact (First and Last name)	Dr. Stefan Schaffer
Primary E-mail	stefan.schaffer@dfki.de
Position Title / Office	Senior Researcher

Section B: Internship Information	
Internship Project Title	Innovative user interfaces for a learning platform
Department/Faculty (if applicable)	Cognitive Assistants
Supervisor Name	Kinga Schumacher, Eva Schwaetzer
Supervisor's Email	kinga.schumacher@dfki.de , eva.schwaetzer@dfki.de
Length of internship	2 months
Start and end date	01.12.2020
Payment (if any)	31.01.2021
Hours (per week)	40
Company Description	The German Research Center for Artificial Intelligence (DFKI, http://www.dfki.de/web?set_language=en&cl=en) was founded in 1988 and has research facilities in Kaiserslautern, Saarbrücken, Bremen and a project office in Berlin, where the internship will take place. In the field of innovative commercial software technology using Artificial Intelligence, DFKI is the leading research center in Germany. Based on application oriented basic research DFKI develops product functions, prototypes and patentable solutions in the field of information and communication technology.
Position Description (describe the duties and responsibilities of the intern)	We offer one internship for a interaction design or computer science student, who are imaginative and open to new ideas. In the KI-Campus project we are developing an online learning platform with a focus on Artificial Intelligence. The platform should be user-centric and adaptive. Therefore, we plan to conduct a study on user interfaces of dialogue systems. The study includes a survey of frequently used interaction paradigms and evaluates them regarding cognitive psychological aspects. The study will be conducted by a psychology student. Within the scope of this study, we offer an internship, which will contribute to the creation of the study and focus on the UI designs of the dialogue systems. Based on the results, new and innovative UI concepts are to be developed afterwards (also within the scope of the internship).

Additional Information
(please include specific skills, areas of study, language competencies, year of study required)

Curiosity and open-mindedness are a must. Basic or extended knowledge in Interaction design will help. If you want to learn German, we will be happy to converse in German, but English is also OK – we will improve our English skills when working with you.

Due to legal restrictions, we cannot pay for your internship. We will provide all material you need if it is within our budgetary constraints.
