SC INF 425 LEC 850
INT D 420 LEC 850**

Sequences and patterns are based on the days of the week on which courses and clinicals are taught. Please refer to Bear Tracks for exact schedules.

Notes on Clinical Placements

Clinical practice preparation prior to the start of clinicals is required in addition to direct course hours. Details are included in the course outline.

Assigned times for Clinicals (e.g. 6:30am-11pm, 12:01am-11:59pm) indicate the possible ranges of time when clinical shifts may be scheduled.

The shifts will be assigned by the clinical setting, specifics on the times and locations will be provided in the course notes. Hybrid Clinical Learning Days may also be scheduled as a part of Clinicals.

After the registration deadline (**June 15th**), students will be set up in HSPnet and assigned their placements. Students should not attempt to register themselves into different sections thereafter to swap placements.

If you have already completed your placement request for NURS 485 and you have serious concerns about your placement, i.e., health concerns, academic concerns, or a conflicting UNE position, please contact nursing.preceptorship@ualberta.ca.

Students may not go to a unit/area where they have worked or have a relative working on the unit. Please notify the Faculty as soon as possible following the posting of clinical groups if you find you are placed where you work or have worked.

Clinical Accommodations are available for students that require them. Please apply via the procedure on the webpage for each clinical course in which you require accommodations: <https://www.ualberta.ca/nursing/student-services/undergraduate/clinical/clinical-accommodations.html>

Please apply for Clinical Accommodations as soon as possible. Applications received after May 1st for Fall 2024 courses and September 1st for Winter 2025 courses may have fewer accommodations available.

Sequences and patterns are based on the days of the week on which courses and clinicals are taught. Please refer to Bear Tracks for exact schedules.
