Dear Professor Flanagan,

Please accept my sincere congratulations for your new position as President and Vice-Chancellor of University of Alberta.

Université de Lorraine has had a very good relationship with UofA for more than 20 years, both in education and in research, and is actively working on expanding this relationship. We had planned to visit your university last **March**, but had to cancel the visit on short notice because of the evolution of the CoVid pandemic.

We have strong cooperation in engineering, with the CME at the Faculty of Engineering, and we are committed to enhance our cooperation to other domains of mutual interest, such as agriculture, bio-engineering, biotechnologies, computer science, materials sciences and nanomaterials. The are topics which are among the strengths of both universities.

We sincerely do hope that a new opportunity will come to visit our colleagues and meet you if possible in 2021. If you plan a trip to Europe in the coming months, we would be very happy to welcome you for direct exchanges about this cooperation.

With my best regards,

Pierre MUTZENHARDT
Président

Université de Lorraine
